Subject Index for Volume 102

A

A-bomb survivors, follow-up study of, 657
ABB Sanitec, 841
accelerator mass spectrometry, 450–452
  of aluminum, 941–942
acetonitrile, National Toxicology Program tests of, 823
acetylcholinesterase, inhibition by nerve agents, 21
Acoustic Thermometry of Ocean Climate, 816
acquired immune deficiency syndrome, role of nitrite inhalants in transmission, 858–861
acrylonitrile, National Toxicology Program studies of, 918
adenocarcinoma, from radon exposure, 828
adriamycin, 194
Aedes aegyptii, effect of climate change on, 442
affidavits, preparing, 670
Africa
  environmental problems, 854–856, 1018–1023
  infant and child mortality, 1019
  occupational health, 1023
  subsistence agriculture, 1021
  water supplies, 1019
age, as a risk factor, 141, 620
Agency for International Development, U.S., 142, 148
Agent Orange. *See* 2,4,5-T
agricultural chemicals. *See* herbicides; pesticides
agriculture
  as source of pollution, 430
  exposure of workers to azinophosmethyl, 580–585
  organic methods, 429
  subsistence in Africa, 1021
AIDS. *See* acquired immune deficiency syndrome
airline pilots, cancer among, 661
airplanes, air quality on, 819
air pollution
  and benzene exposure in Taiwan, 279
  and daily mortality, 186–189
  effect on nasal mucosa, 1074–1080
  in China, 155–156
  in Latin America, 1027
  indoor
    in Africa, 1023
    in China, 156
  national emissions standards for, 43
  particulate, 274, 480
alachlor, health effects of, 256
alcohol consumption
  association with neural tube defects, 142
  as risk factor for colon cancer, 1039
alligators, developmental abnormalities in, 680–688
alternative methods, 275
  funding for, 825
  validation of, 1014
aluminum
  absorption of, 943
  and Alzheimer's disease, 940
  analysis of, 941–943
  in blood, 945
  as risk factor for osteoporosis, 392
  sources of exposure, 941
  uptake by cells, 946–947
alveolar macrophages
  phospholipase activity, 372
  silica in, 862–868
Alzheimer's disease, role of aluminum, 940
American Academy of Arts and Sciences, 153
American Forest and Paper Association, 367
American Paper Institute, 367
amines
  biological effects of, 138–139
  induction of heart damage by, 194–199
  induction of hepatocellular carcinoma by, 190–193
  in foods, 96
1-amino-2,4-dibromoanthroquinone, National Toxicology Program tests of, 823
2-amino-3-methylimidazo[4,5-f]quinoline (IQ),induction of cardiac damage, 194–199
amiodarone, attenuation of silica toxicity by, 372–378
amyl nitrite, abuse of, 858–859
amyotrophic lateral sclerosis, 46
anencephaly, 140
anilines, reaction with butylated hydroxyanisole, 96–99
animal studies, diets for, 314–315
antibiotics, aminoglycoside
  effect on hearing, 926
Anti-Drug Abuse Act, 858
antifouling coatings, development of, 1013
antihistamines, carcinogenicity of, 911
antioxidants, dietary, 460
α_1-antitrypsin, 645
aplastic anemia, associated with benzene exposure, 280
aquatic models, 16, 270, 272
arsenic
  bioavailability in soil, 182–184
  contamination in China, 156–158
  effect on hearing, 929
  risk assessment of, 354–356
arsenic trioxide, National Toxicology Program studies of, 918
arylamines, reaction with butylated hydroxyanisole, 96–99
asbestos
  carcinogenicity of, 424–426
  chrysotile
    cocarcinogenesis with radon, 68
    health effects of, 147
  deposits in China, 157
  link to colon and colorectal cancer, 1041–1048
aspirin, effect on hearing, 926
asthma, childhood, 739, 1010
ataxia telangiectasia, 434, 822
atomic absorption spectrophotometry, compared to X-ray fluorescence, 174
atomic absorption spectroscopy, of aluminum, 941
azadirachtin, 1009
azinophosmethyl, exposure of agricultural workers to, 580–585

B

Babbitt, Bruce, 41, 42, 370
Bacillus thuringiensis, use in repelling insects, 638
bacteria. *see also* bioremediation
  role in methylmercury elimination, 74
BEIR (Biological Effects of Ionizing Radiation) V report, 656
benzene
  animal data on, 279–280
  biomarkers of exposure, 281
  exposure routes, 276
  induction of leukemia by, 277
  outdoor levels of, 278
benzethonium chloride, National Toxicology Program tests of, 823
benzo[*a*]pyrene
  equivalents, 348

benzo[*a*]pyrene (*cont.*)
immunotoxicity of, 302
induction of tumors by, 84
benzo[*a*]pyrene diol epoxide, uptake by respiratory epithelial cells, 216–220
benzophenone, National Toxicology Program studies of, 917
beryllium
and cancer, 529–530
disease, 536
genetic tests for, 530–531
uses of, 526
Biennial Report on Carcinogens, 522
biodiversity, 268, 371, 1030
effect of climate change on, 443
in Southeast Asia, 736
treaty on, 517
bioengineering
of foods, 636–639
of hemoglobins, 1013
of mammary gland, 846–851
of soybeans, 625
bioinformatics, 136
biomarkers
definition of, 50
validating, 306–309
bioremediation
of hazardous waste, 842
of polychlorinated biphenyls, 552
using metals, 1013–1014
biotransformation, 564
birth defects, 46, 140
associated with residence, 817
blackfoot disease, 355
bladder cancer, 355
and smoking, 51
bovine growth hormone, 632, 637, 638
brain
Decade of the Brain, 920–923
effect of cyanide exposure on, 1014
Brazil, environmental progress in, 444–445
breast cancer
effect of dietary estrogens on, 572–578
and electromagnetic fields, 1008
and environmental estrogens, 634
gene for, 822
grants for research on, 48
from radon, 65
breast milk
dioxin in, 968–971
as source of methylmercury exposure, 74–77
as source of polychlorinated biphenyl exposure, 678
bromoxynil, 625
bronchial epithelial cells, effect of hydrogen peroxide and ozone on, 972–974, 1068–1072
Browner, Carol, 41–42
bryostatin 1, 519
butadiene
biomarkers of exposure, 285
carcinogenicity of, 282–283
epidemiology, 284–285
t-butyl alcohol, National Toxicology Program tests of, 823

C

cabbage, anticarcinogenic effects of, 428
cadmium
cellular metabolism of, 272
intestinal absorption of, 1058–1066
as risk factor for osteoporosis, 391–392
toxicokinetics of, 78–81
caffeine, effect on blood lead concentration, 878
calcium
effect on blood lead concentrations, 878
regulation of, 152–153
as risk factor for osteoporosis, 391
Calgene Inc., 636
California Environmental Protection Agency, pesticide regulation by, 1088
cancer. *See also specific types of cancer*
effect of climate change on, 440
quantitative risk assessment, 149
rates of, 516
role of environmental health science in prevention of, 728
cancer slope factor, 349, 354
carbon dioxide, role in climate, 437
carbon disulfide
effect on hearing, 927–928
neurotoxicity of, 147
carbon tax, definition, 444
carcinogens
comparison of human and rodent, 758–762
natural, 431
cardiomyopathy, 196, 198
carotenoids, conversion of nitrogen dioxide to nitric oxide by, 460–462
Carson, Rachel, 536–537
Cartwright, R.A., 433
casein genes, 644
cataracts, effect of climate change on, 440
cell membranes, research on, 1012
cellular stress response. *See* stress proteins
chemical industry, stand on Superfund, 366
chemicals, environmental, ethnic differences in response to, 432
Chemical Specialties Manufacturers Association, 910
Chemical Stockpile Disposal Program, 18
chemical warfare agents, toxicity of, 18–38
Chernobyl nuclear disaster, 470
chromosome aberration from exposure to, 664
children, susceptibility to environmental chemicals, 634
China, environmental problems in, 154–159
chloramphenicol acetyltransferase, induction by dietary estrogens, 575
chlordecone, 381
chlorine
banning, 510, 626
government policy, 367
Chlorine Chemistry Council, 367, 626
chlorofluorocarbons, alternatives to, 429–430, 754
chloroform, exposure to, 1082–1087
cholinesterase monitoring, 581
cigarettes. *See also* environmental tobacco smoke; smoking
DNA damage by tar, 870–874
ingredients of, 734–736
lead in, 388
as source of benzene, 278
Cincinnati, Ohio
air pollution in, 186–189
Cincinnati, University of
Center for Environmental Genetics, 432
cisplatin, effect on hearing, 926
Clean Water Act, 288, 367, 740
Clean Water Network, 367
cleft lip and palate, 46
climate change, 431, 1030
economic implications, 446
environmental health effects of, 440–443
factors affecting, 436–437
measuring, 816
modeling, 436, 438–439

climate change (*cont.*)
public policy issues, 444–447, 624
research goals, 824
Climate Change Action Plan, 431, 448
Climate Change Treaty, 431
clinical ecology, 746, 747
clinical trials, participation of pregnant women in, 752–753
cloud cover, role in climate, 437
coal burning, pollution from, 154, 156
coal miners, silica in lungs of, 862–868
Cohen, Stanley, 629
coke oven workers, immunosuppression in, 302–304
Collegium Ramazzini, 146
colon cancer, 53
and asbestos, 1041–1048
risk factors for, 1039–1040
colorectal cancer
classification of, 1040
contribution of trihalomethanes to, 151–152, 586–588
in asbestos workers, 1041–1048
Community Outreach and Prevention Education Program, 49
Compton scattering, 172
Conde v. Velsicol, 626
congenital defects. *See* birth defects
conservation. *See* biodiversity
Consortium for International Earth Science Information Network, 360
contraceptives, oral
as risk for neural tube defects, 142
Convention on Biological Diversity, 517
Coon Come, Matthew, 623
Cooper, Glinda, 631
copper, gastrointestinal effects of, 958–961
cosmetics, lead in, 388
cosmetologists, occupational health risks, 520–521
cotton, use of organic methods to grow, 429
coumestans, 572
coumestrol, 632
Council on Sustainable Development, 371
m-cresol, National Toxicology Program studies of, 918
crystallization, of proteins, 1035
curacin A, 519
Cuyahoga River, 740
cyanide, effect on brain, 1014
cyclophosphamide, 196
cytochalasin B, effect on glucose transport, 457
cytochromes P450, and mechanisms of chemical carcinogenesis, 852–853

D

Dai Qing, 159
data, combining, 222
Daubert v. Merrell Dow Pharmaceuticals, 626, 675
DDE, 626
DDT, 381, 633
Dear, Joseph, 516–517
Decade of the Brain, 920–923
2,4-decadienal, National Toxicology Program studies of, 918
Deetes, Tuenjai, 622
Defense Environmental Restoration Account, 370
defoliation, chemical, 429
Delaney Clause, 371
Delor 103, 553
deltorphins, 650
dengue
effect of climate change on, 442
in Latin America, 1024
Department of Defense, Installation Restoration Program, 841
Department of Energy
nuclear weapons complex, 841
radioactive disposal sites, 832
depositions, 670–671
dermal exposure monitoring, 580–581
dermorphins, 651
deserts, biodiversity of, 268
detergents, toxicity of, 1012
Developmental Centers Program, 824
developmental toxicity
in marine animals, 680–688
of metals, 1012
of polychlorinated biphenyls, 676–679
diabetes, as risk for neural tube defects, 141
diarrheal diseases, in Africa, 1019
dibenzofurans, in food, 962–966
dichlorodiphenyl sulfone, National Toxicology Program studies of, 917
dieldrin, estrogenicity of, 380
diesel exhausts, effect with radon exposure, 70–71
diet
association with neural tube defects, 142
cadmium in, 1058
dioxin content of, 962–966, 968
effect of glucosinolates in, 428
estrogens in, 472–578
heterocyclic amines in, 190
as source of chemical exposure, 78
diethylstilbestrol, 633, 676
diethyltoluamide, banning, 910
Dinoseb, 842
dioxins, 147, 814
in breast milk, 968–971
effects of prenatal exposure to, 676–679
in food, 962–966
inhibition of glucose transport by, 454–458
media coverage of, 425
reassessment of, 622
role in endometriosis, 476–477
dipropylene glycol, National Toxicology Program studies of, 918
diuretics, effect on hearing, 926
DNA
adducts, measuring, 307, 450
damage
by hydrogen perioxide, 973
by tobacco smoke, 870–874
repair, 52–53
sequencing, 54
slippery, 52, 364
dose, definition of internal, 50
dose–response relationship, 354
assessment of, 223, 261
doxorubicin, 194
drug addiction, 649
drug development, 268, 1036
Duke University Marine Biomedical Sciences Center, 1012

E

ear, inner. *See also* hearing
structure of, 925, 927
Earth Day, 358–359
Eastern Europe, environmental health in, 696–698
ecogenetics, origin of, 432–433
ecosystems. *See also* marine ecosystems
effects of toxicants on functions of, 266, 936–939
risk assessment of, 532–535
EDTA chelation test, 174
electrical resistance, transcellular, 1069
electromagnetic fields, grants for research on, 48

elimination, phase III, 422
elmiron, National Toxicology Program studies of, 917
El Nino, 443
emphysema, and α_1-antitrypsin, 849
encephalitis, 442
endangered species, 535
Endangered Species Act, 42, 368
endocrine disruption, 634
  by polychlorinated biphenyls, 568
endometriosis, possible role of dioxin, 476–477
endosulfan, estrogenicity of, 380
energy-dispersive X-ray analysis (EDXA), 862
Envirogen Inc., 842
environmental health
  clearinghouse, 49
  international issues, 625
  knowledge of, 310–312
  progress in 1994, 1030–1031
  research in Latin America, 254
  training of medical personnel in, 522
Environmental Health Conference for the Middle East Region, 41
Environmental Health Sciences Centers, 364
environmental justice, 1031
  data on, 817
  executive order on, 361
  Interagency Task Forces, 836–838
Environmental Monitoring and Assessment Program, 222
Environmental Physician Scheme, in Poland, 733
environmental policy. *See* public policy
Environmental Protection Agency, U.S.
  elevation of, 368
  operating budget, 370
  pesticide regulation by, 1068
Environmental Risk Reduction Act, 368
Environmental Simulation Laboratory, 60–62
environmental tobacco smoke. *See also* smoking
  DNA damage by, 870–874
enzymes, role in susceptibility, 51
epidermal growth factor, 629
epigenetic repair system, 538
epilepsy, as risk for neural tube defects, 141
equilibrium models, for aluminum, 942
esophageal cancer, 818
estradiol
  relationship to polychlorinated biphenyls, 295
  reproductive effects of, 569
estrogen receptor, 572
  disruption gene, 1011
estrogens
  effect of dietary on breast cancer cells, 572–578
  environmental
    effects of, 738, 780–781
    pesticides as, 380–383
  possible effect on biliary excretion, 422
  replacement therapy, 912
ethanol, National Toxicology Program studies of, 917
ethnic differences, in response to chemicals, 432
ethoxyresorufin *O*-dealkylase, 568
evolution, effect of pollution on, 266–267
excimer laser fragmentation fluorescence, 932
excitotoxins, 923
excretion, biliary, 422
exercise, as risk factor for colon cancer, 1039
exposure, definition of external, 50

F

family planning programs, 624
farming. *See* agriculture
Faroe Islands, exposure to methylmercury in population of, 74–77
Federal Insecticide, Fungicide and Rodenticide Act, 1090
fertility drugs, as risk factor for neural tube defects, 142
fetal protection, 752–753
FETAX (frog embryo teratogenesis assay: *Xenopus*), 521
fiberglass. *See* glasswool
fiber intake, effect on absorption of cadmium, 1062
filtration, of aluminum, 942
fish
  cancer in, 1013
  hepatic lesions in, 200–215
  as indicators of water pollution, 764–770
Flavr Savr tomato, 636–637
fluorescence, for monitoring intracellular messengers, 152
fluorescent aromatic compounds, in fish, 764
fluoride
  as risk factor for osteoporosis, 392
  contamination in China, 156–158
food. *See* diet
food chain bioaccumulation, 564
Food and Drug Administration approval procedures, for foods, 637
food safety reform, 369
food supply, effect of climate change on, 442–443
Forest Biotechnology Research Consortium, 41
forest protection, 624
formate, and methanol exposure, 178–181
Freedom Support Act, 148
fuels
  oxygenated, 913
  sources in Africa, 1022
functional toxicology, 635

G

GA. *See* nerve agents
galactose metabolism, 631
gasoline, health effects of, 147
gastrointestinal cancer. *See also* colon cancer; colorectal cancer
  effect of cabbage on, 428
GB. *See* nerve agents
gene expression, grants for research on, 915
gene mapping, 136
General Agreement on Tariffs and Trade, 1031
general circulation models, 437
gene therapy, 59, 820
genetic screening, 59
  for beryllium disease, 530–531
geographic information systems, 43–44
glasswool, carcinogenicity of, 44–45
glial fibrillary acidic protein, effect of lead on, 1052–1056
global warming. *See* climate change
glucose transport, regulation of, 454–458
glucosinolates, 428
γ-glutamyl transferase, 422
glyphosate, 625
Goldemberg, Jose, 444
Goldman Environmental Prize, 622–623

GTS Duratek, 842
gypsum products, from recycled materials, 169

H

hair dyes, health effects of, 520–521
hair-cell receptor, of the ear, 925
halogenated aromatic hydrocarbons, in sediments, 203
Hans L. Falk Memorial Lecture, 152
hazard identification, 261
hazardous wastes
  disposal of, 818, 832–835, 840–845
  sociological effects of remediation, 542–547
health care, primary in Nigeria, 854–855
hearing, environmental impact on, 924–929
heart
  induction of damage, 194–199
  rates of disease, 516
heat-shock proteins, protection against hearing loss, 929
heat stress, 441
hemoglobins, engineered, 1013
hepatic lesions, in fish, 200–215
hepatitis, in China, 158–159
hepatocellular carcinoma, chemical of induction, 190–193
herbicides, crop resistance to, 625
hexane, neurotoxicity of, 147
Hiroshima, A-bomb survivors in, 657
homologous recombination, 434
hormones
  effect of environmental on brain, 921
  in food, 632–635
Hudson River estuary, pollution of, 764–765
human genome, analyzing, 433
Human Genome Project, 54–55
  ethical and legal issues, 58–59
human immunodeficiency virus. *See* acquired immune deficiency syndrome
human protein C, 849
hydrochloric and hydrofluoric acid, contamination from volcanic activity, 480
hydrofluorocarbons, 429–430
hydrogen peroxide
  effect on bronchial cells, 972–974
  production by tobacco smoke, 872
hydrophobicity, 563
hydropic vacuolation, 202
hydroxyanisole, mutagenicity of butylated, 96–99
hydroxyl radical, generation by ultraviolet radiation, 88
2-hydroxy-4-methoxybenzophenone, National Toxicology Program studies of, 917
hygiene education, 310–312

I

immune system
  effect of climate change on, 440
  effect of nitrites on, 859
  effect of polycyclic aromatic hydrocarbons on, 302–304
  effect of ultraviolet light on, 298–301
immunization programs, in Nigeria, 855
immunoglobulins, as indicators of polycylic aromatic hydrocarbon exposure, 730
incineration
  alternatives to, 840–845
  real-time analysis of emissions, 932–934
information superhighway, for environmental data, 360
initiation/promotion skin bioassays, 82–87
insecticides
  organic, 1009
  use in Africa, 1022
insect repellants, health effects of, 910
Institute of Genomic Research, 136
Institute of Medicine, 752
insulinlike growth factor, 637
  health effects of, 633
  role in mammary tissue, 846
Intergovernmental Panel on Climate Change, 438, 444
International Agency for Research on Cancer, 164
  directorship, 149
  monograph series, 165, 590–591
  workshop on quantitative risk, 149
International Science Foundation, 163
Internet, 49
interspecies comparisons, 14
ionizing radiation, health effects, 656–667
IQ. *See* 2-amino-3-methylimidazo[4,5-f]quinoline
iron, effect on absorption of cadmium, 1062
isoflavanoids, 572, 632
isoniazid, 432
isothiocyanates, as anticancer compounds, 428

J

joint implementation, of emissions reduction, 445
Just Compensation Act of 1993, 42

K

Kamel, Laila, 622
kanamycin-resistant gene, 636
Kaposi's sarcoma, 860
kidney cancer, from radon, 65
Kleihues, Paul, 149
Kompass Resources International, 162
Kyshtym nuclear disaster, 470
